

Workshop agenda

- 1. Introductions
- 2. What is social prescribing, how does it work, and physical activity and sport organisations' potential relationship to it
- 3. To explore the possible benefits which could come from closer working and identify what differences could be made to people's health outcomes by doing so
- 4. Approaches to social prescribing that physical activity and sports groups could adopt
- 5. Barriers and enablers to greater collaboration between the social prescribing and physical activity and sports sectors
- 6. Sported member case study of collaboration with social prescribing
- 7. Next steps
- 8. Any questions

Hello...

I am.... I work in....

Today's session would be really great if...

Social prescribing

- What it is, why it was set up, what its purpose is
- How it functions, roles and responsibilities
- How service provider sectors work with it
- Questions and answers

A global conceptual definition of Social Prescribing

"a means for trusted individuals in clinical and community settings to identify that a person has nonmedical, health-related social needs, and to subsequently connect them to non-clinical support and services within the community by co-producing a social prescription: a non-medical prescription to improve health and wellbeing, and to strengthen community connections."

[what's missing from this definition?]

Social, economic, and physical factors significantly influence behavioral health outcomes.

Socioeconomic factors
47%

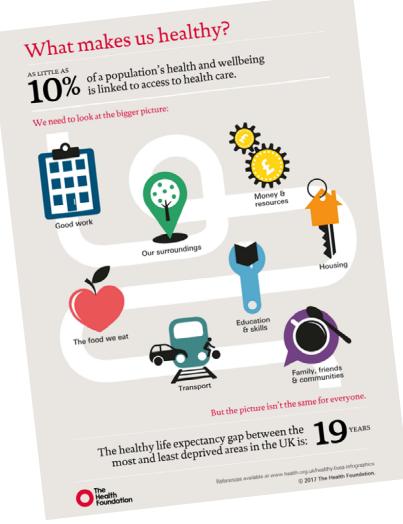

84% of the factors that contribute to a person's total health are found outside the formal health system

Health behaviors
34%

Physical environment

Clinical

care

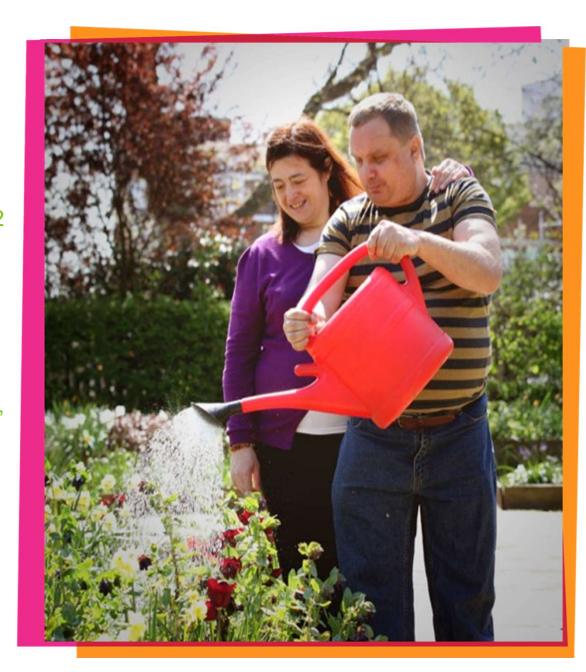

The Marmot Review, into what really creates health and wellbeing outcomes in our communities.

And how we might apply that understanding.

Development of Social Prescribing in Scotland

- There are now 314 social prescribing link workers across the 14 Health Boards and its 32 local authorities. There are also independently funded social prescribing link workers.
- Link workers may be employed by the health system or by community charities
- There are two national networks of social prescribing,
- The Scottish Community Link Worker Network, of health service funded link workers and part of the Primary Care Network
- Scottish Social Prescribing Network, of independently funded link workers

Social Prescribing represents to greatest cultural change in the NHS in decades
Prof Martin Marshall Chair RCGP

Development of Social Prescribing continued

- There is support for social prescribing from
- Michael Matheson, Scottish Cabinet Secretary for Health and Social Care
- Maree Todd, Minister for Social Care, Mental Wellbeing and Sport
- Jenni Minto, Minister for Public Health and Women's Health
- Development of a mapping project to map social prescribing activity in Scotland and create an interactive map to support access and connection
- Development of the link worker role and specialist link worker roles (children and young people, mental health, older people, AND in secondary care, and custody settings)
- Using data to understand cohorts of patients that social prescribing might be offered to

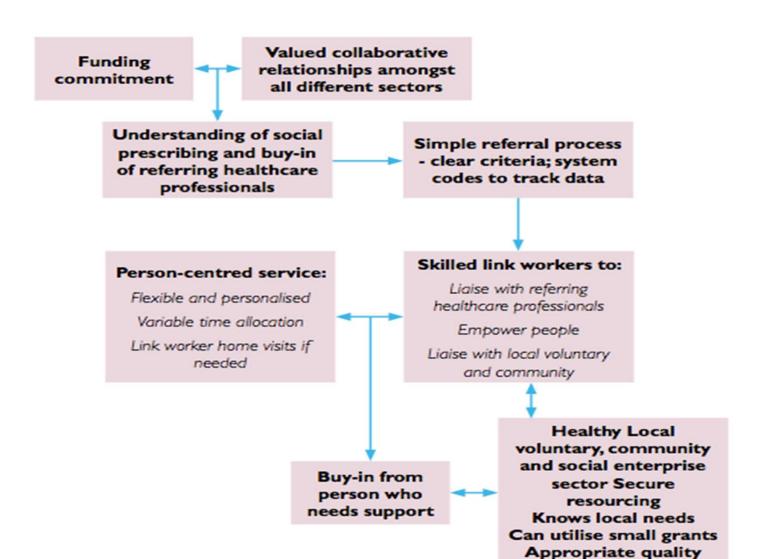

Some of the social prescribing networks

- Aberdeen
- Aberdeenshire
- Dumfries and Galloway
- Dundee
- Edinburgh (16 years and above)
- Fife
- Fourth Valley
- Glasgow (all age)
- Highlands and Islands, including Orkney
- Inverclyde
- North Ayrshire

To get in touch with these groups:

Contact **Alison Leitch**, based at Edinburgh Voluntary Organisations' Council (EVOC) who can put you in touch with any of these networks:

Social Prescribing as a system

What does a social prescribing link worker do?

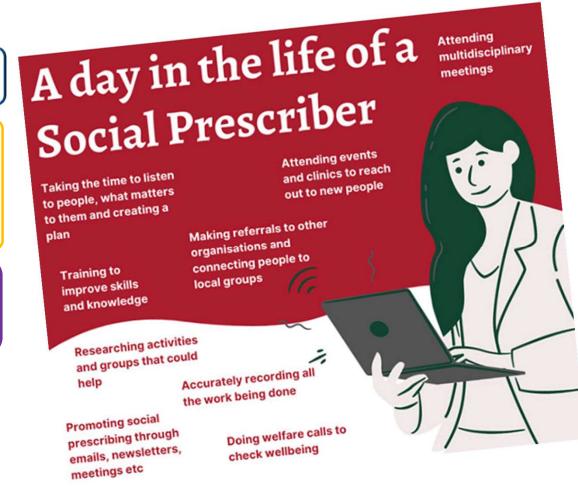

Social prescribing in General Practice enables local agencies to refer people to a link worker.

Link workers give people time and focus on what matters to the person as identified through shared decision making or personalised care and support planning. They work with them and connect people to community groups and agencies for practical and emotional support.

Link workers collaborate with local partners to support community groups to be accessible and sustainable and help people to start new groups

Social prescribing is especially helpful for people

- who have complex social and/or economic needs which affect their wellbeing
- with one or more long-term health conditions
- · who need support with their mental health
- · who are lonely or socially isolated

What are the issues social prescribing clients want and need support with*?

Network 6 - Social Prescribing 2022/23

73% of social prescribing concerns involved basic needs
13% of social prescribing concerns involved exercise and/or weight management

Average change in concern severity before and after engagement with Social Prescribing teams

Area of concern	Number of concerns
Benefits	166
Housing	107
Finances/Debt	78
Exercise/ Weight Management	61
Mental Health	42
Social Connection	26

Models of children and young people's social prescribing

Social Prescribing for CYP can be all age (0 up to 18/25 years) and/or can be targeted at particular cohorts for specific reasons:

- Long term conditions such as asthma, diabetes
- Mental Health e.g waiting CAHMS assessment, social isolation, low level anxiety and depression
- At risk of youth violence, offending, school exclusion/refusal
- Learning disabilities and autism e.g waiting autism assessment
- Transition points (e.g. children to adults services, primary to secondary school, step down from statutory services)
- Whole family approach (e.g. younger children, complex needs)

How might physical activity and sports groups become involved with social prescribing?

- 1. Receiver of social prescribing referrals to your activities
- 1. Have a social prescribing function within your team. Either by training a team member or have a social prescribing link worker do in-reach work with your clients
- 1. Spend some time becoming social prescribing ready

Exploring the possible benefits which could come from closer working between Sported members and social prescribing.

Identify what differences could be made to people's health outcomes through working with social prescribing

How might physical activity and sports groups become involved with social prescribing?

- 1. Receiver of social prescribing referrals to your activities
- 1. Have a social prescribing function within your team. Either by training a team member or have a social prescribing link worker do in-reach work with your clients
